EPFAT Account Access

(NOTE: STEP 2 was revised November 2018)

1.   NOTE: Our Army Corps of Engineer Information Technology (ACE-IT) recently moved where the EPFAT database was hosted to comply with DoD IT requirements we in USACE have to live by. It is now at what they call a "DMZ" hosting server. As a result if anyone Googles "EPFAT" unfortunately Google gives them they get the OLD EPFAT website URL that is no longer active.

The NEW correct EPFAT URL is: https://epfat.usace.army.mil

2.   ***HOWEVER, the user's computer must also have DoD Certificates loaded on it before it will allow them to access that website.***

Those DoD web certificates can be accessed, downloaded and installed on the user's computer from the following URL:

https://iase.disa.mil/pki-pke/getting_started/Pages/windows.aspx

On this website go to Step 3 and install the DoD root certificates with InstallRoot 5.2 which should have the latest ones to be able to use the EPFAT website.
