**ATTENTION INTELLIGENCE**

July 19, 2022 | 7:00 am - 11:00 am MST | Cost: $85.00 pp

Attention management represents a big break from past ideas about how to be more efficient and increase productivity. It is based on the way we work today. Attention management offers the ability to consciously direct your attention in any given moment, to be more proactive than reactive, and to maintain control rather than inadvertently relinquish it. It’s about regaining control over your attention and thereby taking control of your life. Attention management empowers your productivity. The techniques of time management were designed for a world that no longer exists. In the past, knowledge workers could easily block out specific time on their calendars, shut their office door, and work from their calendar to complete the task at hand. A lot has changed in the past few years that has irreversibly altered this work environment.

Mindfulness and Attention management are the ability to control distraction and maximize your focus. Mastering these skills enable you to be present in your moments, engage your flow, and unleash your genius.

The Minnesota Federal Executive Board will not be handling registration for this training. Please use this link to get your tickets: https://www.eventbrite.com/e/mindfulness-and-attention-management-tickets-272383545517
